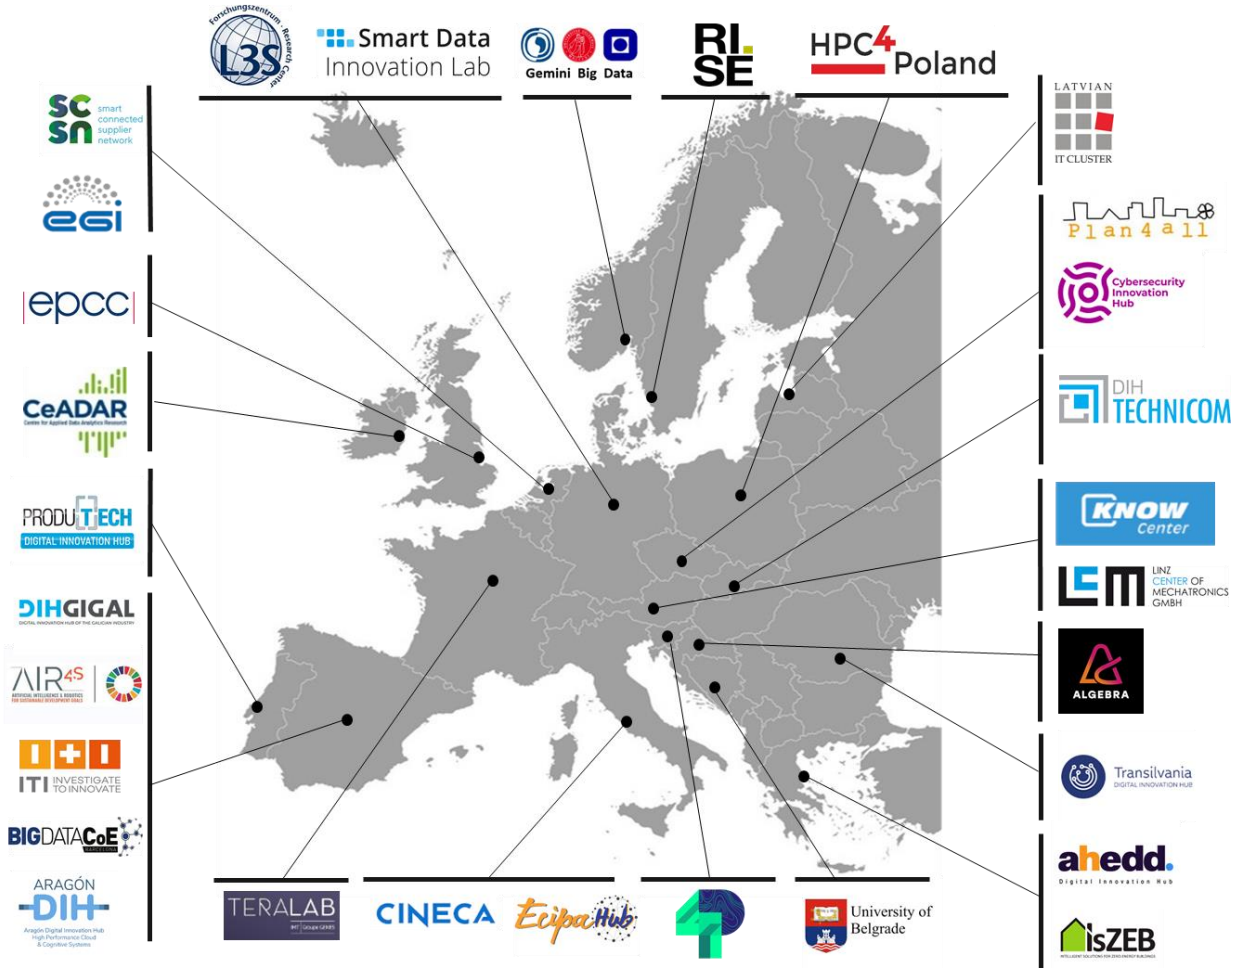
EUROPEAN FEDERATION OF DATA DRIVEN INNOVATION HUBS

EUHubs4Data Data Sharing activities in Data-Driven experimentations

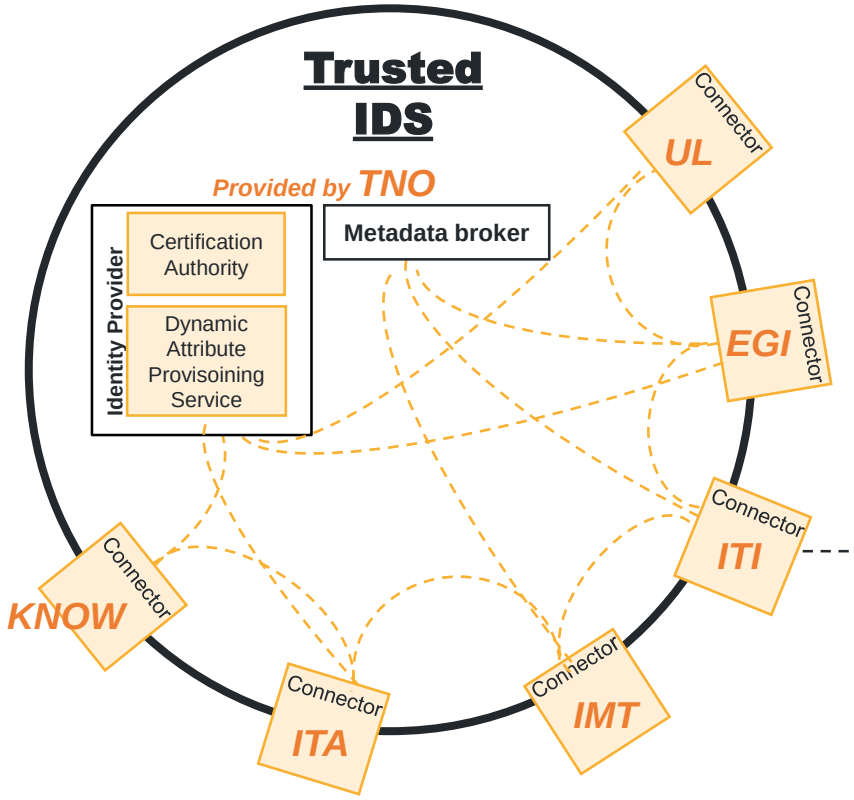
Antoine Garnier, International Data Spaces Association

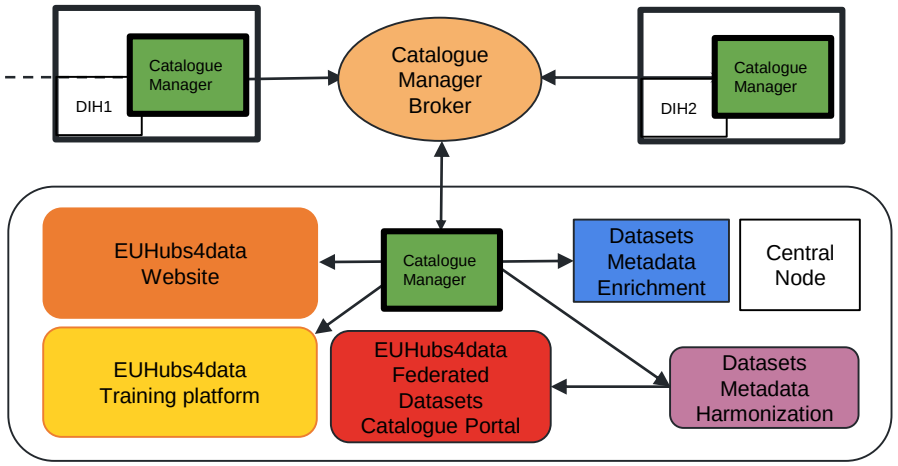
Global catalogue, local offer



A data sharing solution for DIHs

- Federated catalogue of technical and business services
- Technical interop-erability for synchronized assets





Challenges

- Maturity of the technical components
- Components evolving at a fast pace
- Maturity of DIHs on data sharing
- Levels of trust

Achievements

- A fully-fledge IDSA-based ecosystem
- New technical components: **EGI DataHub IDS adapter**
- Experiments integrating IDSA-based data sharing
- Legal work around contracts covering data exchange

Long-term view

- Knowledge transfert
- Liaisons with other ecosystems: **DataPorts pilot**
- Open source community
- New requirements: **Data sharing Clean rooms**
